

Saubhagya Munsi

Bagnan, Howrah, West Bengal – Open to Relocation

+91-9641148090 | saubhagyamunsi78@gmail.com | [LinkedIn](#) | [GitHub](#)

Professional Summary

Computer Science graduate with hands-on experience in data analytics and business intelligence using Python, SQL, Pandas, NumPy, Power BI, and Advanced Excel. Experienced in data cleaning, validation, exploratory data analysis, KPI development, data visualization, and identifying trends from real-world datasets. Built interactive dashboards and data-driven applications for sales and operational analysis, translating structured data into actionable business insights. Strong analytical and problem-solving skills with a keen interest in Data Analytics, Business Intelligence, and Data Science.

Experience

Data Science Intern
DST Infosolutions Pvt. Ltd.

July 2025 – September 2025
Kolkata, West Bengal

- Worked on data analysis projects using Python, Pandas, NumPy, and Matplotlib.
- Performed data cleaning, visualization, and analytical tasks using real-world datasets.
- Assisted in machine learning and reporting workflows during internship projects.

Technical Skills

Languages	Python, SQL, Core Java, C
Data Analytics & BI	Pandas, NumPy, Matplotlib, Advanced Excel, Power BI, ETL, Data Cleaning, Data Validation
Machine Learning	Scikit-learn, Supervised Learning, Unsupervised Learning, Data Preprocessing, Feature Engineering, Model Evaluation, PyTorch, TensorFlow
Generative AI & LLMs	Google Gemini API, LLM Fundamentals, Function/Tool Calling, Prompt Engineering, RAG Fundamentals
Frameworks & APIs	FastAPI, REST APIs, API Integration, Streamlit
Databases & Tools	MySQL, Git, GitHub, Postman, VS Code
Computer Vision	OpenCV, Image Processing
Programming Concepts	OOP, Data Structures & Algorithms, SDLC

Projects

Cloud Kitchen & Food Delivery Management System | [Link](#)

- Developed a relational management system modeled after food delivery platforms, featuring an interactive multi-page web dashboard using Streamlit and a MySQL backend.
- Implemented MySQL triggers and views to automate workflows, including order count updates upon delivery and dynamic restaurant rating recalculations.
- Built CRUD administrative modules for customers, restaurants, menus, drivers, orders, and payments with strict foreign-key constraints to maintain data integrity.

Road Accident Analysis | [Link](#)

- Built an interactive Power BI dashboard for road accident analysis using data cleaning, data modeling, DAX, and visualization.
- Developed KPIs, calculated measures, and interactive filters to analyze accident frequency, casualty trends, severity,

vehicle types, road conditions, and temporal patterns.

- Performed exploratory data analysis to identify trends, patterns, and high-impact factors associated with road accidents.
- Designed business-oriented dashboards and visual reports to communicate analytical findings clearly and support data-driven decision-making.

Sales Revenue Tracker Dashboard with KPI | [Link](#)

- Developed an interactive Sales Revenue Dashboard in Microsoft Excel to monitor Revenue, Profit, Profit Margin, Orders, and Average Order Value.
- Built dynamic reports using Pivot Tables, Pivot Charts, Slicers, and Timelines to analyze sales performance across regions, products, and sales representatives.
- Performed data cleaning, validation, and transformation to ensure accurate reporting and reliable business insights.
- Automated KPI calculations using advanced Excel formulas and conditional formatting to support data-driven decision-making.

Book Review Management System | [Link](#)

- Developed a desktop application to manage book reviews and ratings using Python and MySQL.
- Implemented CRUD operations for storing, updating, searching, and managing book review records using Streamlit.
- Designed a local database solution for efficient data persistence and retrieval, improving data organization and accessibility.

Heart Disease Prediction System | [Link](#)

- Developed an ML-powered prediction system using the Random Forest algorithm.
- Performed data preprocessing, feature engineering, and model evaluation.
- Built a Streamlit application for real-time prediction.

AI Book Recommendation System | [Link](#)

- Developed an intelligent book recommendation system using Python and data analysis libraries.
- Performed data preprocessing, cleaning, and transformation for recommendation logic.
- Built an interactive Streamlit interface for user-friendly recommendation delivery.
- Applied similarity-based recommendation techniques for personalized book suggestions.

Gemini AI Tool Calling Agent | [Link](#)

- Built an AI agent using the Google Gemini API to process natural-language queries and autonomously select and execute relevant Python tools.
- Implemented LLM function calling with custom calculator and student-grade evaluation tools, demonstrating tool orchestration and AI-driven task execution.
- Designed a modular Python codebase with separate agent, utility, configuration, and testing components to enable easier feature expansion.
- Integrated python-dotenv for secure environment-variable configuration and developed an interactive CLI workflow.

Image Processing System | [Link](#)

- Developed an interactive web-based image processing application using Python, OpenCV, NumPy, Pillow, and Streamlit.
- Implemented resizing, grayscale conversion, thresholding, filtering, edge detection, and region-of-interest processing.
- Built an interface for image upload, real-time processing, visualization, and comparison of original and processed images.

Education

College of Engineering and Management, Kolaghat

2022 – 2026

B.Tech in Computer Science and Engineering

CGPA: 6.74

WBCHSE

2022

Higher Secondary

84.20%

WBBSE

2020

Secondary

91.14%

Certifications

- **Advanced Data Analytics with Python and Gen AI** – Anudip Foundation
- **EFSET English Test** – 58/100, B2 Category, Upper Intermediate Level
